LEADING THE WAY IN FIRE PROTECTION

# INSULATED VERTICAL FIRE CURTAIN

Tested to BS EN 1634-1:2014+A1:2018. Dry Insulation for up to 90 minutes. Integrity and Radiation Control for 240mins.

## PRODUCT DESCRIPTION

The FireMaster® Insul8 provides thermal insulation. This feature helps in containing heat within a specific area, which is particularly important for protecting escape routes, preserving structural integrity, and reducing the risk of secondary fires. This product can be face fixed only.

An EI fire curtain refers to a fire-resistant curtain or barrier designed to provide specific levels of integrity (E) and insulation (I) in the event of a fire.

## PRODUCT TESTING

The FireMaster® Insul8 fire curtain has completed testing at Warrington Fire to BS EN 1634-1:2014+A1:2018 and third-party certified to E240 EW240 EI90 (E=Integrity, EW=Radiance, EI = Insulation)

## APPLICATIONS

Lobbies and Receptions, Opening in Walls, Egress and Corridor Separations, Compartmentation, Protected Means of Escape
